OUR COLLABORATION MATTERS

WHEN LOOKING FOR COUNSEL WHO CARES AS MUCH AS YOU DO

Our Energy attorneys and consultants understand the energy industry and regulatory climate, knowledge that is key to crafting customized and effective solutions to take advantage of opportunities and address your pressing challenges.

Together, we strategize to get the job done — from project approvals, regulatory compliance, to economic incentives.

Delivering America's Energy Future

With every advancement in technology, we are using electricity in more ways—and more efficiently—than ever. Electricity runs our homes and businesses. It powers our cities and communities and makes innovation possible.

America's electric companies are investing to make the energy grid smarter, more dynamic, more flexible, and more secure to meet the needs of our digital economy. We're supporting smart energy policies to ensure that all customers continue to have the safe, reliable, affordable, and increasingly clean energy they depend on to power their everyday lives.

Together, we are delivering America's energy future.

10:15 – 11:30 am	Commissioner Roundtable	Garden Terrace Ballroom

The natural gas and oil industry provides a bright future for all Americans. The innovative technologies pioneered by America's natural gas and oil industry are meeting our country's energy needs and producing cleaner energy and reducing industry's environmental footprint. Our air is cleaner than it's been in decades and emissions are at 25-year lows, thanks to increased use of natural gas. That's how we are powering past impossible and soaring toward a cleaner, better tomorrow.

RETAIL ENERGY CHOICE BENEFITS CONSUMERS

The Retail Energy Supply Association is a broad and diverse group of retail energy suppliers who share the common vision that competitive retail energy markets deliver a more efficient customer-oriented outcome than the regulated utility structure.
